

## Isoshealth: access to funding institutions

“ It was so helpful to access a list of funds that could be sorted and investigated, being able to quickly qualify who were the right funds to approach. ”

Isoshealth

Kim Page, Founder and CEO

UK

### My challenges

- Looking for potential investors.
- Access to funding institutions is quite difficult since they are not very visible.
- When finding a source of information, most of the time seemed unreliable and very generic.

### eHealth HUB support

#### eHealth HUB Platform.

“The eHealth HUB Platform allowed me to quickly qualify who were the right funds to approach.

When you are in the platform, you can appreciate the quality of the funding names. Being able to access a trusted list of funds is an advantage. When you use other channels such as contributors on Medium (among others) you do not know if the information is always current or is the best starting point for you.

Besides, the information is structured with very relevant criteria for us. It was so helpful to access a list of funds that could be sorted and investigated!”

### The company

We are a marketplace that puts clinical wellbeing expertise at your fingertips. We are clinical to maintain quality, and digital to democratize access, We are holistic covering Diet, Body and Mind and we are bespoke, in-person video consultations to give tailored advice.

# eHealth HUB *Stories*

## Learning points ●

*“I would advice everyone to use trusted channels to source the best most up to date research.” “Putting the effort into targeting pays off - literally”*
