My challenges

- Finding European partners
- Opportunity Matching
- Identifying the healthcare needs of the European community

eHealth HUB support

eHealth HUB Platform.

eHealth HUB platform was tremendously helpful to identify the specific need for healthcare technology in Europe and allowed us to expand E*HealthLine Ecosystem outreach.

In the platform, we were able to filter the existing technologies by clinical and business fields, thus giving us an idea of the products available nowadays. This helped us to discover in which aspects we were stronger and where we could improve.

We also understood better the needs of the demand-side organisations and their partnering model with startups like us.”

The company

E*HealthLine has developed a complete ecosystem of innovative intellectual property and comprehensive Artificial Intelligence software, dissimulated utilizing the imedCloud and the companies innovative Integrated Mobile Platform that provides essential interoperability between devices and sensor applications. Innovation and resourceful technology are at the core of E*HealthLine’s offerings, providing enhanced performance that uniquely interacts with all mobile devices and platforms, while engaging the user and accelerating a course of action that tracks, manages and updates all captured data. E*HealthLine’s Ecosystem includes 30 life Science - Pharmaceutical Enterprise Systems & 23 integrated or stand-alone applications consisting of HIS, EHR, EPrescribing, Telemedicine, Telehealth, etc. for Hospitals, Clinics, Labs, Pharmacies and Pharmaceutical Manufactures.

eHealth HUB *Stories*

Learning points ●

“Continuation of the eHealth HUB platform is important for identifying the new opportunities and to identify the healthcare community needs and requirements.”

Sorin Stircu, Regional Life Sciences Strategist

eHealth HUB services

eHealth HUB platform

The eHealth HUB platform (platform.ehealth-hub.eu) is the map of European digital health. An online catalogue that identifies the key players to enhance transparency in the sector and encourage stakeholders' interaction
